Temporary Livestock Fencing Workshop

New to modern energized fence technology? At this hands-on workshop, you will discover the opportunities available to livestock producers through the use of modern temporary fence technology.

June 29th, 2018
9:00am to 12:00pm
Rice County Fairgrounds
1900 Fairground Dr. #17
Faribault, MN 55021

Topics will include:

- *How temporary fences fit in grazing/cropping situations*
- *How an energized fence works*
- *Temporary livestock fence equipment options*
- *Temporary fence installation and maintenance*
- *Plus, hands-on use of temporary fence materials!*

This information will be useful for livestock producers interested in grazing their animals, crop producers interested in incorporating livestock into their operation, or anyone who'd like to learn how to include modern energized temporary fencing on their operation.

Held in collaboration with the Sustainable Farming Association and sponsored by K Fence Inc.

Pre-registration is requested but not required.
